

## HANVO GENERAL HANDLING PU GLOVE

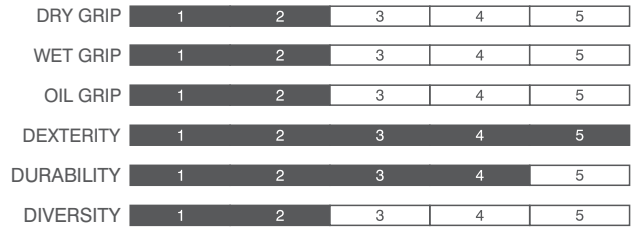

### MECHANICAL RISK PROFILE

Performance against mechanical risk tests as stipulated by the EN388 standard.

### POLYURETHANE COATING PROPERTIES

Polyurethane is a thermosetting polymer that forms a thin coating with low particle shed. It's flexibility offers superior dexterity and good grip.

### SPECIFICATIONS

- Seamless 13 gauge black polyester liner provides increased comfort, dexterity and breathability.
- Polyurethane (PU) palm coating provides excellent abrasion & tear resistance without compromising tactile sensitivity.
- Knit wrist helps prevent dust & debris from entering the glove liner.
- Washable to extend the glove life and reduce replacement costs.
- Breathable back for comfort.
- Sizes: 8/M, 9/L, 10/XL.
- Dimensions (+/-5%): 255mm x 102mm x 36g.
- Packaging: Individually packaged pairs, 12 pairs per bag, 120 pairs per carton.

### FEATURES

- |             |                      |           |
|-------------|----------------------|-----------|
| Strong Grip | Flexible             | Light     |
| Breathable  | Ergonomically Shaped | Soft Feel |

### APPLICATIONS

- |                          |                         |                         |
|--------------------------|-------------------------|-------------------------|
| Automotive               | General Duty            | Gardening / Agriculture |
| Assembly / Manufacturing | Transport / Warehousing |                         |
